

## *C4 BreachPop®*

### *Information Sheet*

BreachPops were designed with three goals in mind:

- 1) **Lower the N.E.W. to increase operator safety and reduce collateral damage**
- 2) **Be simple to build**
- 3) **Interface with an operator's standard equipment**

The BreachPop is a tamped charge container made from soft ABS plastic containing P3D Solutions, Inc's proprietary tamping medium. Our tamped casing allows for the use of less explosive materials on a given target than when using traditional breaching methods. BreachPops are designed to be easy to carry, using equipment already available, so operators never have to place charges in pockets, dump pouches, or specialty pouches. A pistol magazine pouch can hold up to two BreachPops and an M4 pouch can hold up to four. Standard BreachPops are available in 5" and 8" heights and charges can be built out to lengths ranging from 5" to 12". Custom lengths available on request.

The **10g and 15g C4 BreachPops** have pre-measured channels that hold ~10g or ~15g of C4 plastic explosives. Designed to allow the operator the ability to use bulk explosives in a more technical way. Field expedient, easy to build, easy to carry and easy to deploy with its direct prime cap well, the C4 BreachPops provide a vigorous breach on your target!

10g C4 BreachPop  
N.E.W.: .033 LBS TNT  
MSD: 5.7'

#### Terms of Use, Warning and Disclaimer

When loaded with explosives, the BreachPop is a fundamentally dangerous product. Improper application may result in serious injury or death. P3D Solutions, Inc and BreachPop, LLC assume no liability, express or implied, from the use or misuse of this breaching apparatus. While shot data has been gathered in the development of this product, there is no warranty, express or implied, resulting from the use of said data.

Patent Pending

**Easy to Build, Easy to Carry, Easy to Deploy**
