

BreachPop® #2

Information Sheet

BreachPops were designed with three goals in mind:

- 1) Lower the N.E.W. to increase operator safety and reduce collateral damage
- 2) Be simple to build
- 3) Interface with an operator's standard equipment

The BreachPop is a tamped charge container made from soft ABS plastic containing P3D Solutions, Inc's proprietary tamping medium. Our tamped casing allows for the use of less explosive materials on a given target than when using traditional breaching methods. BreachPops are designed to be easy to carry, using equipment already available, so operators never have to place charges in pockets, dump pouches, or specialty pouches. A pistol magazine pouch can hold up to two BreachPops and an M4 pouch can hold up to four. Standard BreachPops are available in 5" and 8" heights and charges can be built out to lengths ranging from 5" to 12". Custom lengths available on request.

The **BreachPop #2** has a channel sized to hold two pieces of 25 or 50 grain det cord. This charge can be built singly as an IDC capable of defeating solid wood doors or with two linked together to create a mini-nunchuk for deadbolt/doorknob combos. The mini-nunchuk will fold in half where the BreachPops are joined, allowing it to be carried in a magazine pouch without protruding more than a standard magazine. The 8" BreachPop #2 builds into a low N.E.W. IDC designed to clear out more of the door above and below the door knob, including solid wood doors.

BP#2: 5" IDC
N.E.W.: .011 LBS TNT
MSD: 4.0'

BP#2: 12" Mini-Nunchuk
N.E.W.: .026 LBS TNT
MSD: 5.3'

Terms of Use, Warning and Disclaimer

When loaded with explosives, the BreachPop is a fundamentally dangerous product. Improper application may result in serious injury or death. P3D Solutions, Inc and BreachPop, LLC assume no liability, express or implied, from the use or misuse of this breaching apparatus. While shot data has been gathered in the development of this product, there is no warranty, express or implied, resulting from the use of said data.

Patent Pending

Easy to Build, Easy to Carry, Easy to Deploy
